

Deploy Frontend Site on Vercel

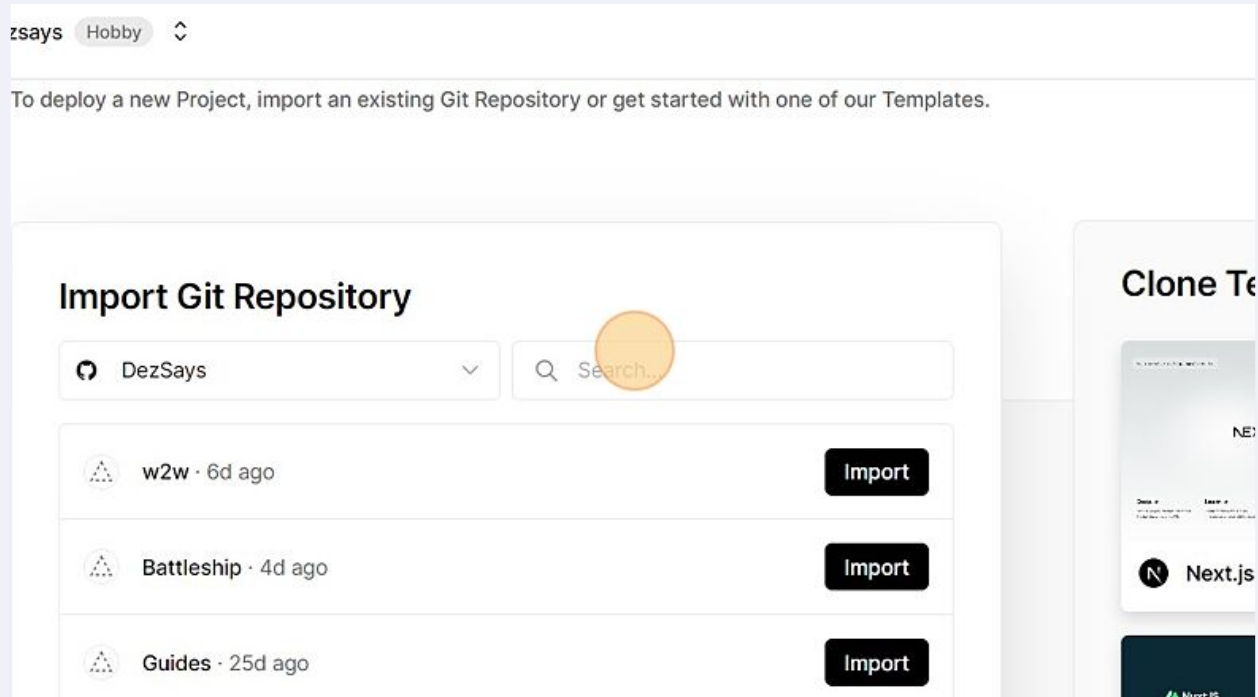

1 You must log in or create an account with Vercel first

2 Navigate to vercel.com/dashboard

3 Click "Create a New Project"

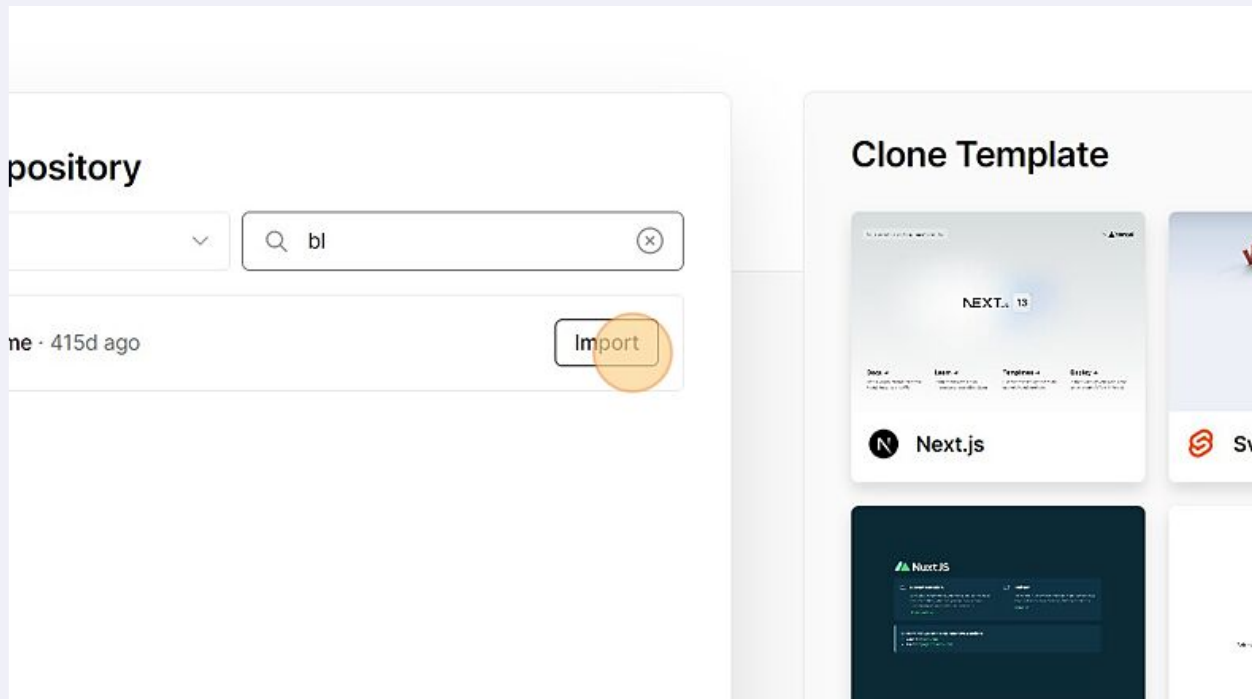

4 Click the "Search..." field.

5 Type the name of the repository you wish to deploy

6 Click "Import"

7 When your app has successfully deployed, you can click the image of your app and it will take you to the live site
